

**Very high strength, quick tack time, advanced application control, CFC & Halogen free.**

**Description** Very high strength aerosol spray adhesive designed to give an excellent bond strength on a wide variety of materials. Ideal for medium to large area coverage. Cures quickly after application to provide a quick tack time / assembly time. The advanced nozzle allows for economic and accurate application control. Applications include: domestic, automotive & marine, carpet & upholstery fixture, vinyl flooring fixture. Bonds head cloths in vehicles. Bonds cardboard materials can be used for palletising and case assembly. Bonds textiles, foamed/expanded plastics, metal, leather, concrete, stone, cork, rigid plastics and wood. Fixes polyethylene sheets to walls etc. before removing asbestos. Fixes in place thermal insulation. Bonds are flexible, tough and permanent.

<b>Colour</b>	Straw
<b>Base</b>	Synthetic Rubber/ Resin
<b>Application Temperature</b>	+5°C – +40°C
<b>Drying Time</b>	2 – 3minutes

### Features

- Does not contain CFC's, Dichloromethane, 1,1,1 Trichloroethane or Halogen.
- Foaming formula for high performance on porous surfaces.
- Advanced nozzle allows for economic and accurate application control.

### Directions

- 1) Ensure surfaces are clean, dry and free from dirt and grease. Remove white aerosol cap and ensure nozzle is pointing away from face. Adjust nozzle for low, medium or high rate of discharge.
- 2) From approximately 15 – 20cm above the surface, spray a light even coat of adhesive over both surfaces to be joined together and leave to dry for 3 – 5 minutes until surfaces are tacky. If the materials you are bonding is porous, apply two coats of adhesive, allowing it to dry in between coats.
- 3) Assemble surfaces and apply even pressure over the entire surface to ensure edges are secure and voids are compressed.
- 4) Handling strength is reached immediately after assembly and full cure is achieved after 24 hours.
- 5) To prevent nozzle from blocking after use, turn can upside and down and press the nozzle until the spray is clear of adhesive.

**IMPORTANT:** Always spray a small amount of adhesive onto an inconspicuous area of the material to be bonded to ensure the adhesive is compatible. Do not use on plasticised PVC and expanded polystyrene.

### **Health and Safety: Extremely Flammable**

Do not breathe vapour or spray. Pressurised Container – do not puncture, incinerate or expose to heat even when empty. Do not spray on naked flame or any incandescent material. Keep away from sources of ignition – No Smoking. Keep out of reach of children. In case of insufficient ventilation, wear suitable respiratory equipment.

**Sizes** 500ml Aerosol

Equine • Agricultural • Gym • Play
