

Luxury Mattress

Quattro Luxury Mattress is approximately 35mm thick and is made using Quattro's Interwoven Rubber Top Cover. The design of the system allows for the option of either single cubicles or a continual cover spreading over a number of cubicles. The cover and design caters for easy, natural drainage keeping cleaner beds and cows.

- Fully resilient
- Easy clean
- Completely sealed
- Impervious cover
- High penetration resistance for long life
- Moulds to the contours of the animal
- High strength seamless Rubber matting
- Completely bonded
- High memory infill's "The Cows Choice"

After looking into other mattresses and mats we discovered that most systems still have inherent problems, some have porous covers, some have covers that split, both a breeding ground for bacteria. Some are filled with rubber crumbs that spread when used forming a hollow holding dirt and urine. Wet bedding gets underneath some cubicle systems causing deformity in the mats. All these are potentially mastitis problems. Taking the above into account Quattro have produced a superb thick, comfortable, strong mattress that overcomes all of the above, providing comfort & safety.

The holding strips are made of a strong flexible plastic compressed board and all that is required for fixing is a hammer drill, hammer fixings and washers.

Quattro also have professionally trained fitters.

The new mattress fulfils all the husbandry requirements laid down under the new farm assurance scheme.
