

QUATTRO®

Flexscreed Play

The Rubber & Resin Specialists

Quattro's Flexscreed® Play system has been designed for use in Play Areas, Swimming Pool Surrounds and Splash Parks plus any other areas that require a safe surface. Safety has always been one of the foremost requirements.

The Flexscreed® Play system can be applied in various thicknesses that give different degrees of safety and critical fall heights. It provides a seamless cushioned protective surface for children and adults alike.

Flexscreed® Play can be applied in one layer of Black or Coloured EPDM rubber or two layers with a larger recycled SBR rubber as a base layer to give extra cushioning with a wearing layer of EPDM on the surface.

Standard systems are Black. Colours can be introduced to provide more aesthetic appearances with UV Resistant binders available to stop discolouration.

Patterns and pre manufactured rubber shapes can be added to the area.
