OUR PROFESSIONAL FITTING SERVICE

Here at Quattro Products we are renowned for our excellent quality and service. Quattro have been supplying and fitting rubber flooring since 1986 not only in the UK but all over the world. Rubber flooring has proven to be very useful in a wide range of environments and when the right rubber surface is fitted correctly it will last for years.

Rubber flooring and stable mats have been a huge success in the equestrian world as it has many benefits including comfort, grip for added safety, it also has brilliant insulation and hygienic properties and is very durable and cost effective.

Rubber stable mats can be laid loose or Quattro fit fully bonded and sealed rubber stable mats and seamless rubber flooring in stables, wash boxes, American barns, indoor and outdoor walkways, horse walkers, horseboxes, racecourses and veterinary clinics.

We also have a wide range of products for stable walls from our stable paint Elastect to the most popular Eva Matting which is a soft foam wall padding and the newest addition to our stable wall range is the Sportsroll this comes in a variety of colours and thicknesses.

Our Rubber Dogbone Pavers and Rubber Brick Effect Tiles also work and look great in walkways and equine bridges these products are commonly used in racecourses and larger equine facilities. Our team of fitters have worked at some of the best racecourses in the UK and largest equine centres in the world.

We also offer a seamless rubber system, the high tensile Flexscreed® system is designed as an open or sealed rubber screed ideal for stables, parade rings, horse walks, yards, etc. It provides a seamless cushioned protective surface for horses riders and grooms. Standard systems are black, colours can be introduced to provide more aesthetic appearances.

STABLE FLOOR MATTING

WHY CHOOSE QUATTRO'S RUBBER MATTING?

There are so many different types of rubber mats available for stables that it can be difficult to know which is best for you. Most suppliers only carry a few different types of rubber mats this can lead to people to purchase rubber stable mats only to find that they are unsuitable for their own situation, some wear too quick, some spread & curl, some hold moisture and urine, others can't be sealed or bonded.

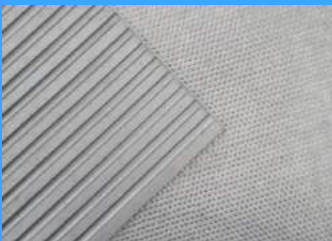

Quattro supply such a wide range of rubber stable matting which makes us confident that we will have the correct product for your use and the size of your horse.

Over the last 30 years Quattro have built up a good reputation as one of the UK's leading suppliers and fitters in rubber matting. As we import most of our products from abroad in large quantities we can offer a very competitive price to our customers.

At Quattro we are continually expanding our range of products therefore we are able to offer the best products for our customers needs.

2m x 1.2m Wide
Increased Resistance and
Abrasion Resistance
6 MPA Highest Quality

STABLE WALL PROTECTION

Rubber stable floor mats have been very popular for many years and wall mats are now becoming just as popular as they not only look great but have great sound deadening, anti-cast and insulation properties.

Our protective Eva mats have a heavy density cushioned foam construction with a Checkerplate profile pattern on the front surface. They are also impact resistant for protection of your horse and walls and lightweight for easy handling. We regularly use these in stables, wash boxes and horse transport etc. Eva's come in various thicknesses and colours with the standard being black, orange and blue also available but other colours can be made to order on request.

We advise using capping strips as it really finishes the look off but also stops the edge of the eva's being pulled and chewed by your horse. We have capping strips in hardwood Sapele and Oak.

We have been using Sports Roll on walls for many years it is very strong against impact the surface is excellent for its traction, sound deadening and shock absorbent qualities its very durable and has extremely good insulation properties with an attractive finish. Sportsroll comes in various thicknesses and colours starting from the 20% coloured fleck to the dual fleck and full coloured rubber roll.

EVA

Medium Profile
10, 25 & 35mm in Depth

BONDING AGENTS & FIXINGS

SUPERLEX MEMBRANE

Twin pack adhesive for bonding our rubber rolls and sportsroll. Can be used to bond mats where no foaming of the resin is required. Easier to use for self application.

We have worked with the UK's leading resin manufactures to achieve a collection of stable adhesives that we guarantee work, are animal safe and stand up to long term use.

MATBOND

Quattro's specially formulated resin adhesive designed for bonding rubber mats, It not only bonds permanently but foams and fills joints and gaps.

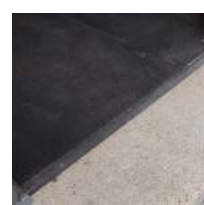

HARDWOOD CAPPING

Our hardwood capping is ideal for protecting your Eva wall matting from getting damaged from horses chewing. Also available in oak upon request.

Q/FLEX

Single pack, quick curing urethane joint sealant that gives high flexibility and is resistant to ageing. Perfect for sealing joints around rubber mats.

DOOR STRIPS

For protection of the stable mats in doorways, around drains and any other exposed edges.

HORSE WALKERS, WALKWAYS & YARDS

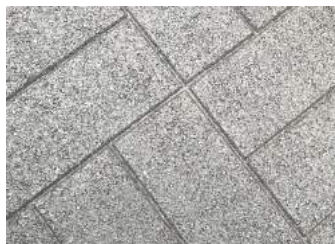

It's very important to have the right flooring in your horsewalker so you know your horse is comfortable and safe while exercising. Rubber flooring in horsewalkers has proven to reduce shoe wear and muscle strain as well as providing an anti-slip surface. Our team of fitters can fit rubber mats or rubber pavers to any size horsewalker plus all our rubber is cut to size on site to ensure the best fit. Rubber Dogbone Pavers and Brick Effect Tiles look great in yards, walkways and equine bridges these products are commonly used in racecourses and larger equine facilities. Our team of fitters have worked at some of the best racecourses in the UK and largest equine centres in the world.

FLEXSCREED®

QUATTRO'S SEAMLESS TROWELLED RUBBER

Quattro's high tensile Flexscreed® system is designed as an open or sealed heavy duty rubber screed ideal for Stables, Racecourses, Horse Walks, Yards, etc. It provides a seamless cushioned protective anti slip surface for horses, riders and grooms. Standard systems are black but colours can be introduced to provide a more aesthetic appearance.

The standard depth of Flexscreed® is 15mm-20mm but this can be varied to suit the environment required. It can provide a competitively priced option to the heavier pre manufactured rubber tiles.

Flexscreed® is ideal to apply to difficult shaped areas and will deal with poor and uneven substrates without the requirement of a great deal of Groundwork's.

The sealed version of our Flexscreed is designed for internal areas such as Stables, Washbays & Passageways. Flexscreed has also been used at numerous Zoo's around the UK.

Flexscreed Sealed gives a completely seamless fully sealed rubber floor that is easy to keep clean. It can also be applied in a coloured screed with a clear seal coat to give a very aesthetically pleasing finish.

Quattro can carry out a full installation with our own experienced and trained applicators or products & instructions can be supplied for self application.

**We also supply a flexscreed kit for
stables, horseboxes and external areas.**
