INTRODUCTION

Quattro supply a range of products for applications in sports & leisure, from bespoke supply & fit systems like Flexscreed® to the very strong Sportsmat for varied range of areas. The systems comply with critical fall height & health & safety requirements. Quattro can provide products for own use or provide a full fitting service.

SPORTSMAT

Sportsmat for Leisure

Sportsmat is very durable against mechanical impact, weights & traffic. The areas are safe & sound deadened. A high material density provide toughness over & above standard flooring. The surface is kind on joints & ligaments & ideal for all forms of indoor sports. Safe for running, jumping, boxing & exercise. Sportsmat will stand up to aggressive environments, ice skates, golf shoes etc. EPDM flecks provide a pleasing decorative effect.

Sportsmat for Commercial

Due to the high wear, capability & safety aspects of Sportsmat it can be used in a wide variety of applications, offices, passageways, showrooms, toilet facilities, canteens. Resin sealers can provide most of the quality found in epoxy & urethane screeds & they ensure hygiene, easy to clean, anti-slip surface.

Sportsmat for Schools

Sportsmat is ideal for indoor and outdoor areas that require an anti slip surface, either wet or dry. Sportsmat provides a much softer surface than concrete for those unwanted falls.

Sportsmat for Wet Areas

The surface texture is superb for anti-slip, even in wet areas, around swimming pools etc.

SUPERMATS & AMOEBIC MATS

Ideal in gymnasiums & free weights areas. Will withstand heavy wear. Low cost per square meter.

High quality, heavy duty durable natural rubber. Low profile Amoebic or Hammered pattern one side & broad ribbed fluted pattern other side. Reversible for extended life, easy to clean with an extended thickness & size range.

HOLLOWMATS & GOLF MAT

Once an area has been fitted with Hollow Mats on grass the area will then become a safe and clean environment for outside Play Areas, Golf Courses, Caravan Parks and Schools.

This is an easy and economical solution requiring no specialist preparation. This allows the grass to grow through looking natural with no mud and mess.

M² INTERLOCKS

A superior, high grade & durable all rubber moulded mat ideal for gymnasiums, play areas and a multitude of other applications, which is easy to lay & cut to size. The mat has interlocking connectable edges & has an attractive round studded surface on one side & an orange peel pattern on the other. The mats are reversible and have an easy to clean surface.

ange peel pattern on the other. The mats are reversible and have an easy to clean surface.

CUSHION ROLL

Our Cushion Roll is the ideal all-round mat made of coarse rubber granulate with a thickness of 730 kg/m³ with a variety of advantages. Versatile application. Very good technical rating.

Simple and inexpensive to lay. Elastic (adapts to the foundation). Water vapour diffusion (no vapour trap). Environmental

characteristics (rot resistant, age-resistant, long-life, resistant against fungus, insects and microbes). Chemical resilience (resists effects of acids and alkalis). Sound deadening - cushion layer. Great for play areas & areas of movement, indoor & outdoor.

SUPER CUSHION TURF

Super Cushion Turf is a 18mm thick 1m² interlocking playtile with fully bonded artificial grass, that is perforated for drainage.

The tiles are perfect for play & leisure areas, in caravan parks & much more.

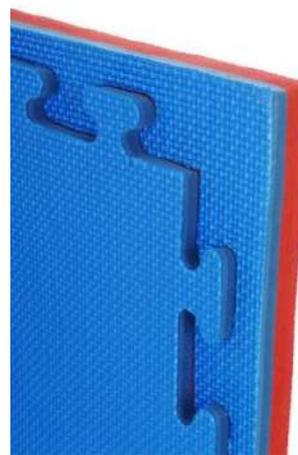

PLAYSOFT

Playsoft are widely used as karate & taekwondo mats, in gymnasiums, play areas, around swimming pools & general areas of movement inside and outside.

Playsoft are lightweight interlocking tiles made from EVA compound. They are 38-44 shore hardness with a light textured surface. They are interlocking and in red/blue that is reversible. They are light & affordable, soft & protective. They can be laid loose, may be lifted & moved & ideal inside & out.

Tiles are 1m² available in 20mm & 40mm thick in red/blue & 30mm thick in grey/green.

RUBBER PAVERS

Rubber Pavers are a heavy duty durable crumb rubber with a slip resistant finish, they have high impact and resilience and excellent protection from falls. A conglomerated moulded rubber crumb tile ideal for areas of movement and activity. Can also be used for general areas of paving offering a warm, safe and comfortable surface.

Available in dog bones, a paved look design & plain tiles. Standard colours are red, black & green, others available to special order.

Rubber Pavers are for use in a very wide variety of applications like golf clubs, paths, driveways, play areas, patios, balconies & much much more.

QUATTROSOFT EVA

A high quality dense and durable expanded EVA foam wall protection mats giving ultimate protection for driving ranges. An ideal mat for self fitting. Superb as crash mats & for use in gyms.

GYM MATS

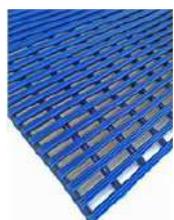

Gym Mats are a heavy duty connectable rubber moulded tile.

Gym mats are a heavy duty durable rubber that is slip resistant with a patterned finish.

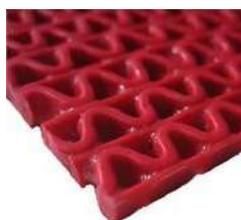

Gym mats are hollowed on the reverse for cushioning so can withstand high impact and has fantastic resilience and has excellent protection from falls.

Gym mats have an integral interlocking design.

ANTI FATIGUE MATS

'Open Grid' High Quality PVC Grid Matting

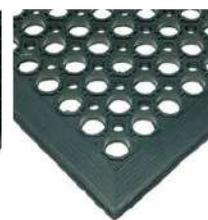

'Lattice' PVC Runner Matting

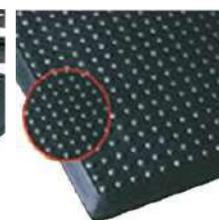

CrushStat PVC Anti Static Foam Matting

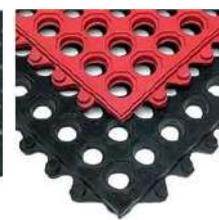

StandSafe Anti-Fatigue Mats

Moulded Rubber Workstation Mats - Drainage Type

BubbleTop Anti-Fatigue Workstation Mats

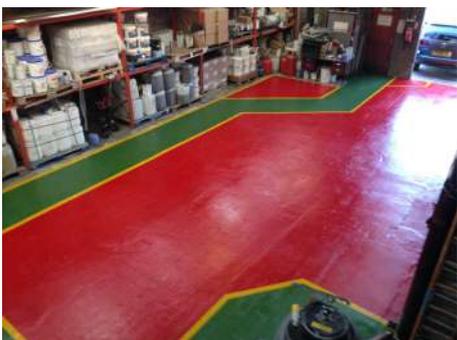

Hollow Ring' Connectable Rubber Tile Mats

Q/TYLE

Quattro have supplied an excellent, light, fast, resin sealer, that does not fade, or discolour. Based upon a tested water clear, anti fungal, anti graffiti resin. The product provides anti scuffing & marking properties & allows the easiest of cleaning regimes. The high gloss finish provides a very pleasing aesthetic finish whilst still retaining grip properties. As a long term product it negates the requirement for continual polishing & cleaning.

COVERTECT PC

Covertect PC has an extremely high abrasion resistance and will withstand heavy traffic for prolonged periods. Covertect PC not only seals but penetrates old and porous concrete acting as a strengthening binder and reinforcer. It is ideal for use as a sealer in food factories, warehouses, storage areas, trucking lanes etc.

warehouses, storage areas, trucking lanes etc.

Q/DECK

Heavy duty high build steam cleanable polyurethane floor coating with anti skid options.

Q/DECK is designed for application in heavy duty, hard wearing areas, such as Bakeries, Car parks, Aircraft Hangars, Pig pens, Plant Rooms, and generally Where a high – build, anti skid surface is required. Q/DECK is also designed as a hard wearing, anti slip finish for Vehicle Decks.

FLOOR REPAIR

Floor Repair compound is a new concept for the repair of concrete and resin flooring. Floor repair is modified polyurethane concrete which has been specifically designed to provide an easy-to-use, primer free compound with exceptional physical properties. Floor Repair exhibits

exceptional resistance to impact and abrasion. Unlike epoxy repair compounds Floor Repair will cure at low temperatures down to 0°C. The cure time is not affected by reduced temperatures in the same manner as epoxies and it is therefore ideal for the average building site repair.

JOINT REPAIR

Joint Repair compound is a new concept for the repair of joints in concrete slabs. It is the only repair compound which has been specifically designed to repair those annoying joints in concrete which break away at the edges and cause a real safety problem in industrial locations. Joint Repair is a flexible yet extremely tough polyurethane which is modified with rubber. Joint Repair has a high resin content compared to most flooring repair compounds and will wet out surrounding surfaces without the need for a primer coat.

SPEEDSCREED HD

Heavy duty high build floor material allowing quick turn around at low cost. For use in factory floors, cold stores & damaged concrete. Can be used on damp surfaces. A.D.A.S approved.

QUATTROBOARD

Quality Polypropylene sheets for high performance at low cost. Tough, durable, resistant to chemicals – the ideal material. Perfect for hygienic control with minimum maintenance. Impermeable and non porous, discourages bacterial growth. Also available in Class 1 Flame Retardant version. Supplied with customised fixtures for perfect finish. Simple and quick to fit. Suitable for a wide range of applications. Comprehensive range of sheets and fittings available in white and blue.

SAFETY STEP EDGINGS

Stair Treads & Stair Nosings
Made from orthophthalic resin and superior quality durable aluminium oxide grit.

Standard colours: black, yellow or grey (RAL numbers made to order).

FLEXSCREED® - PLAY - LEISURE

Flexscreed® rubber is designed as an open or sealed rubber screed for external or internal uses. It is a simple ready to mix system that combines a high strength flexible binder with rubber wetpour resins & systems to BS EN 1177 & BS EN ISO 9001.

Following many years testing Quattro have formulated a high strength flexible binder that is proving to stand extreme high wear. Safety & welfare has always been one of the foremost requirements.

The high tensile Flexscreed® system is ideal for play areas, outside walkways, around swimming pools, areas of movement indoor & outdoor, animal enclosures, etc. It provides a seamless cushioned protective surface for children and adults alike.

Flexscreed® is ideal to provide difficult shapes and will deal with poor and uneven substrates without the requirement of a great deal of Groundwork's. Flexscreed® has the advantage over most rubber systems where the substrate is uneven & poor it can be trowelled through without pre filling.

Products & instructions can be supplied for own use or Quattro can carry out a full installation with experienced and trained tradesmen.

Standard systems are black, colours can be introduced to provide more aesthetic appearances. Quattro has also introduced a colour option that saves a lot of the cost of coloured EPDM rubber. The depth of Flexscreed® can be varied to suit the environment required. It can provide a competitively priced option to the heavier pre manufactured rubber play tiles.
