EQUINE, AGRICULTURAL, LEISURE, PLAY & COMMERCIAL RUBBER MATTING & RESINS
Rubber Matting & Resin Product Catalogue 2022

All prices are plus VAT and Delivery

Over the last 30 years Quattro have built up an excellent reputation as the UK's leading supplier and fitters of High Quality rubber matting. As we import most of our products in large quantities we can offer a very competitive price to our customers.

Our main market is Equine and Agricultural. Safety, hygiene & animal welfare are our main priority as the majority of our mats are made for comfort & slip resistance.

You will notice in our price list that Mpa is mentioned a lot next to our rubber matting. This is the Tensile Strength of the rubber. The Tensile Strength is the force required to cause the rupture of a rubber material and is expressed in Megapascals (Mpa). Solid rubber with a higher Mpa reading indicates a better quality of material. Most stable mats in the UK are 2.5 to 3Mpa whereas Quattro's are up to 5Mpa

We also offer rubber products for gyms, play areas and factories with our products fitted we can guarantee a practical, hard wearing, safe and attractive surface.

We are continually expanding our range of products therefore we are able to offer the best products for our customers needs.

We also have 'In House Fitters' that fit our rubber products nationwide.
